1. Purpose of the Document

The purpose of this document is to enable the client of Forest or Telco that are integrated with Forest to view or search the information base on MSISDN and available short code.

2. Functional

This part describes about the functions and menu provided in the portal.

By default, the main page of the admin portal will list down all Telco with their correspondence short code. The short code will be shown below Telco's logo.

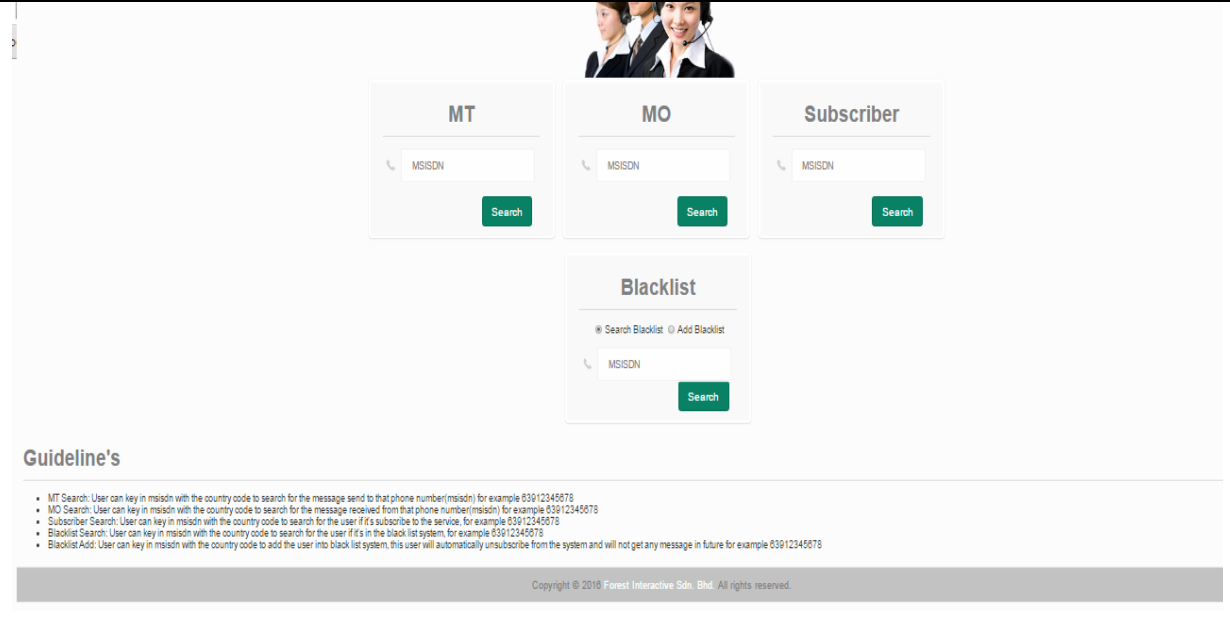

For example, we have two (2) short codes with Maxis, 22322 and 23283.

But the Telco can only view their own short code and they cannot view other Telco's short code.

Basic functions to search and view customer information are available.

After clicking on the Telco's logo with their correspondence short code, user will be directed to main page for further information.

Below diagram explains the four (4) main functions for searching.

The diagram illustrates four main search functions: MT, MO, Subscriber, and Blacklist. Each function is represented by a card with a title, a search input field with a phone icon, and a green 'Search' button. The Blacklist card also includes radio buttons for 'Search Blacklist' and 'Add Blacklist'.

Guideline's

- MT Search: User can key in msisdn with the country code to search for the message send to that phone number(msisdn) for example 63912345678
- MO Search: User can key in msisdn with the country code to search for the message received from that phone number(msisdn) for example 63912345678
- Subscriber Search: User can key in msisdn with the country code to search for the user if it's subscribe to the service, for example 63912345678
- Blacklist Search: User can key in msisdn with the country code to search for the user if it's in the black list system, for example 63912345678
- Blacklist Add: User can key in msisdn with the country code to add the user into black list system, this user will automatically unsubscribe from the system and will not get any message in future for example 63912345678

The four (4) main functions including:

1. MT Search
2. MO Search
3. Subscriber Search
4. Blacklist Search

2.1. Search MT

User is able to search their customer information by keying in the MSISDN and click button “Search”. After that, the customer information will be listed in the table as below diagram. This information would be based on the MT that customer has received.

MT Listing

Below would be the extended search function under MT search:

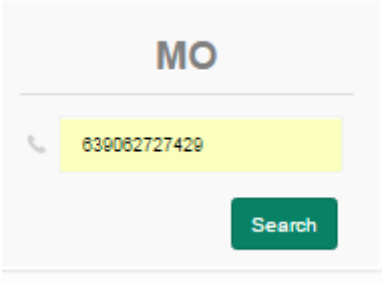

1. Id
2. Date Created
3. MT Id
4. MSISDN
5. Message
6. Keyword Name
7. Content Type
8. Price
9. MT Status

User needs to key in the word into the white box below the column title. For example, sample is shown below when user search Keyword Name “CHITIK”:

2.2. Search MO

User is able to search base on MO from the customer. User needs to key in customer's MSISDN in the box and click Search button.

The image shows a search form for Mobile Originator (MO). At the top, the text "MO" is displayed. Below it, there is a yellow input field containing the MSISDN number "639082727429". To the left of the input field is a small telephone handset icon. Below the input field is a green button with the text "Search" in white.

Customer's information then will be shown in the table.

The customer information that will be displayed are:

1. Id
2. MO Id
3. Date Created
4. MSISDN
5. Message
6. Keyword Name
7. Content Type

User is also able to search base on column displayed for example search base on the Keyword Name.

2.3. Subscriber Search

User is able to search the subscriber's information by keying in the MSISDN and clicking the Search button.

A screenshot of a web form titled "Subscriber". It features a yellow input field with a telephone icon on the left and the number "639082727429" entered. Below the input field is a green "Search" button.

Below diagram shows the sample of subscriber's information after customer's MSISDN has been keyed.

Subscriber Details

The customer's information that will be displayed are:

1. Action
2. Sub Id
3. Keyword Name
4. MSISDN
5. Status
6. MO Id
7. Date Register
8. Date Unsubscribe

This function allows user to unsubscribe the customer from the service by clicking Unsubscribe button in the record that can be found in "Action" column.

2.4. Blacklist Search

This function allows user to search the blacklisted customer's information by keying in customer's MSISDN in the box.

A screenshot of a web form titled "Blacklist". It has two radio buttons: "Search Blacklist" (selected) and "Add Blacklist". Below them is a yellow input field with a telephone icon on the left and the number "639082727429" entered. A green "Search" button is positioned below the input field.

Customer's information will be displayed upon clicking Search button. Details shown are the MSISDN and the date and time that MSISDN has been blacklisted.

for Telco's	
Date	MSISDN
8/7/2016 10:40:06 PM	639062727429

User is also able to add the customer into blacklist list by keying in customer's MSISDN and click "Add Blacklist" button. "Successfully added" will be shown as the indication that the keyed in MSISDN has been added to the blacklisted list.
