1. Purpose of the Document

The purpose of this document is to enable the client of Forest or Telco that are integrated with Forest to view or search the information base on MSISDN and available short code.

2. Functional

This part describes about the functions and menu provided in the portal.

By default, the main page of the admin portal will list down all Telco with their correspondence short code. The short code will be shown below Telco's logo.

For example, we have two (2) short codes with Maxis, 22322 and 23283.

But the Telco can only view their own short code and they cannot view other Telco's short code.

Basic functions to search and view customer information are available.

After clicking on the Telco's logo with their correspondence short code, user will be directed to main page for further information.

Below diagram explains the four (4) main functions for searching.

The diagram illustrates four main search functions arranged in a grid. In the top right corner, there is an image of three customer service representatives wearing headsets. Each function is contained within a light gray box with a title at the top. The 'MT', 'MO', and 'Subscriber' boxes are in the top row, while the 'Blacklist' box is centered below them. Each box contains a search input field with a phone icon on the left, the text 'MSISDN' inside, and '(e.g 60127654321)' below it. A green 'Search' button is positioned at the bottom right of each search area. The 'Blacklist' box also features two radio buttons: 'Search Blacklist' (which is selected) and 'Add Blacklist'. At the bottom of the diagram, a gray footer bar contains the text: 'Copyright © 2016 Forest Interactive Sdn. Bhd. All rights reserved.'

The four (4) main functions including:

1. MT Search
2. MO Search
3. Subscriber Search
4. Blacklist Search

2.1. MT Search

User is able to search their customer information by keying in the MSISDN and click button “Search”. After that, the customer information will be listed in the table as below diagram. This information would be based on the MT that customer has received.

The diagram shows a search interface for MT (Mobile Text) information. It features a large 'MT' title at the top. Below the title is a search input field containing the MSISDN '601120665244'. Below the input field is a green 'Search' button. A hint text '(e.g 60127654321)' is displayed below the input field.

Below would be the extended search function under MT search:

1. Id
2. Date Created
3. MT Id
4. MSISDN
5. Message
6. Keyword Name
7. Content Type
8. Price
9. MT Status

User needs to key in the word into the white box below the column title. For example, sample is shown below when user search Keyword Name “CHITIK”:

The customer information that will be displayed are:

1. Id
2. MO Id
3. Date Created
4. MSISDN
5. Message
6. Keyword Name
7. Content Type

User is also able to search base on column displayed for example search base on the Keyword Name.

2.3. Subscriber Search

User is able to search the subscriber's information by keying in the MSISDN customer and click button Search.

A screenshot of a web form titled "Subscriber". It features a search input field with a telephone icon on the left, containing the placeholder text "MSISDN" and an example "(e.g 60127654321)". Below the input field is a green "Search" button.

The customer's information that will be displayed are:

1. Action
2. Sub Id
3. Keyword Name
4. MSISDN
5. Status
6. MO Id
7. Date Register
8. Date Unsubscribe

This function allows user to unsubscribe their customer from the service by clicking Unsubscribe in the record.

2.4. Blacklist Search

This function allows user to search the blacklisted customer information by keying in customer's MSISDN in the box.

The image shows a web form titled "Blacklist". It has two radio buttons: "Search Blacklist" (selected) and "Add Blacklist". Below the radio buttons is a text input field with a telephone icon on the left, containing the number "639062727429". Below the input field is a hint "(e.g 63127654321)". To the right of the input field is a green "Search" button.

After that, customer's information will be displayed, including MSISDN and the date blacklisted.

The image shows a table with a green header bar that says "for Telco's". The table has two columns: "Date" and "MSISDN". The first row of data shows "8/7/2016 10:40:06 PM" under "Date" and "639062727429" under "MSISDN".

Date	MSISDN
8/7/2016 10:40:06 PM	639062727429

User is also able to add the customer into blacklist list by keying in customer's MSISDN and click "Add Blacklist" button.

The image shows a web form titled "Blacklist". It has two radio buttons: "Search Blacklist" and "Add Blacklist" (selected). Below the radio buttons is a text input field with a telephone icon on the left, containing the number "639062727429". Below the input field is a green "Add MSISDN" button.

2.5. Batch Upload

This function allows user to upload the batch file to un-subscribe user or black list user. File must be in excel format containing one column call MSISDN.

Msisdn can be with prefix for example 6399999999 or without prefix 99999999.

You may select one of the option below and upload your excel sheet and wait for system to finish the task. After task finish user will get notify.

Batch Upload

Choose File

No file chosen

Upload Black list

Choose File

No file chosen

Upload Unsub List

Click chose file to select your excel sheet and then click Upload button.
